- *Excellent for balancing hormones.*
- *Formulated to ease premenstrual, menstrual and menopausal symptoms.*
- *Contains 1.4% Progesterone.*

Ingredient Highlights

Progesterone

Progesterone is a steroid hormone made by the corpus luteum of the ovary at ovulation. Progesterone is the precursor to many other steroid hormones and its use can greatly enhance overall hormone balance.

Progesterone also stimulates bone building and thus helps protect against osteoporosis.

Organic MSM

Used as a carrier to increase the permeability of the cell walls. This allows for superior absorption of the active nutrients and provides enhanced results in a shorter time.
